## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolton (US Patent 6,024,300).

Bolton '300 shows a spray-drawing apparatus comprising a tubular body integrally formed with a liquid storage chamber 2 and an air supply channel in a first cover 1A as recited, wherein a writing element 14 is provided to a front end of the tubular body as recited; the first cover 1A being formed with an opening which allows the writing element to communicate with the ambient air via the opening and a coupling portion as recited; and a second cover 8 formed with a seal portion and at least one air vent 10 as recited.

### ***Allowable Subject Matter***

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

Art Unit: 3752

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Bolton '886 and '388 and Mayer et al. are pertinent to Applicant's invention.
